

# Employ<sup>®</sup>

## PLANT HEALTH & GROWTH RESPONSE

### Employ Activates Your Plant's Health, Defense & Growth Systems

Applications of **Employ** in season adds a second layer of defense against disease, environmental stress and provides a growth response. The plant health response helps reduce the severity and incidence of these seasonal risks for more consistent yield, quality and for higher quality better storing tubers.

## NEMATODES

### Systemic, Plant Based Strategy

There are many soil based nematode strategies, but only **Employ** controls nematodes from within the plant, providing a high level of systemic protection against all plant infecting nematodes for up to 28 days. The plant elicited responses reduce nematode penetration of the roots, limits successful feeding sites, and reduces egg production and survival.

## **In Season Nematode Management**

With the loss of conventional nematicidal products new strategies need to be considered to keep your tubers safe from nematode damage. Employ offers plant based, systemic nematode suppression - protecting your crop from the inside out. Employ is not intended as a replacement for fumigants, it will be most effective when used as part of a normal nematode management program.

## **Systemic, Plant Based Nematode Control Strategy**

There are many soil based nematode strategies, but only Employ controls nematodes from within the plant, providing a high level of systemic protection against all plant infecting nematodes for up to 28 days. The plant elicited responses reduce nematode penetration of the roots, limits successful feeding sites, and reduces egg production and survival.

## **Employ Activates Your Plant's Health, Defense & Growth Systems**

In season applications of Employ, adds a second layer of defense against disease, environmental stress and provides a growth response. The plant health response helps reduce the severity and incidence of these seasonal risks for more consistent yield, quality and for higher quality better storing tubers.

**CONVENIENT CHEMIGATION APPLICATION**

**IN-SEASON FOLIAR APPLICATIONS**

**PROVIDES UP TO 28 DAYS OF PROTECTION**

**CAN BE APPLIED UP TO THE DAY OF HARVEST**

**EXEMPT FROM FOOD TOLERANCE**
