

# Usage Tip Sheet for Green Beans

When Employ® is applied to crops, the harpin protein active ingredient turns on a plant's internal stress-defense and plant growth mechanisms.

## PRODUCT OVERVIEW

Employ® is a Plant Health Promoter based on Harp-N-Tek®, a proprietary harpin protein technology from Plant Health Care Inc. When Employ is applied to green beans, the harpin protein active ingredient binds to harpin receptors on the plant. These receptors respond to harpin as if it were a pathogen, and this reaction initiates an "inside-out plant response" that turns on a plant's own intrinsic growth and stress-defense capabilities.

## PERFORMANCE SUMMARY

In multiple years of commercial and small plot trials replicated field trials, Harp-N-Tek based products have been shown to improve yield in green beans.

- ✓ **Increases in yields typically exceed 20%.**
- ✓ Grower trials using this program have given similar increases in yield.

## USEFUL INFORMATION

- **PACKAGING:** 20 ounce, foil bag; wettable dry granule with 1% harpin<sub>αβ</sub> protein.
- **CROP SAFETY:** Employ has *not* been found to cause crop injury.
- **RAINFASTNESS:** Employ is rain fast after 30 minutes or when spray residues dry.
- **REGULATORY:** Excellent safety profile, easy to use, and not a restricted use material; REI is 4 hours; PHI is 0 days.
- **MIXING ORDER, pH, AND COMPATIBILITY:** After ensuring pH has stabilized between 5 and 10, add Employ to the tank first. Employ is compatible with many products. For a complete list, contact your local representative.

## USE RATE AND TIMING

- **USE RATE:** Apply Employ at 2 oz per acre.
- **TIMING:** Make a single foliar application at first bud break ("pearl").
