

Feeding Nature's Potential Harpin Protein Technology

Peach Sizing Trial 2016 Field Trial Data

CONCLUSIONS

In this trial, two applications of Invoke significantly increased fruit size in Autumn Flame Peaches. Invoke treated trees had 20% more larger and premium fruit when compared with the untreated. There were also 1/2 less smaller fruit in the treated plots compared with untreated.

Appl. 6-14 / 7-05 2016 – Harvest 8-19-16 Invoke applied at 10 oz/ A Sawtooth Ag Research-- Sanger CA
