

AVIV™

The clear choice for disease control this season

Increased Potency for Superior

Disease Control AVIV™ contains the newest most active *bacillus subtilis* strain IAB/BSO3, which is 400 times more active than the competing brand on the market. The patented formulation contains active spores and metabolites for enhanced disease fighting activity.

Easy to Use Clear Liquid Formulation

AVIV is a clear liquid formulation simplifying mixing and handling. The low dose use rate (10-30 oz/acre) allows for lower, more economical application rates.

Multiple Modes of Action – Resistance Management

AVIV deploys multiple modes of action to control and suppress diseases. This multi-site activity not only creates an effective fungicide, but also reduces the opportunity for diseases to develop resistance.

Plant Defense and Plant Growth Response

AVIV stimulates natural plant defense mechanisms and has demonstrated increased plant growth effects. The benefits are a healthier and higher yielding crops.

Pre-Harvest for Post-Harvest Disease Control

AVIV's clear formulation reduces visual residue concerns and the high activity on multiple diseases makes it the natural choice for pre-harvest applications. Reducing the inoculum sources for a wide range of pathogens which can lead to disease in storage.

Foliar Disease Control

AVIV provides broad spectrum fungal and bacterial disease control and prevention for fruit and leaf surfaces. The combination of living spores and metabolites out-compete and knock down plant diseases through reduced germination of harmful spores, reduced disease attachment to plant tissue, and disrupted cell membranes of pathogenic bacteria and fungi.

Cost Effective

The increased disease fighting activity of AVIV and reduced rates make it an affordable part of any disease control program to help control diseases and combat resistance. Opening up opportunities for conventional and organic growers to fight disease more effectively.

Application Methods

- Ground • Air • Overhead irrigation
- Surface drip irrigation

May be applied at any crop stage

- 4-hour REI
- 0-Day PHI
- No Visible Residue
- SAR / ISR
- Resistance Management
- Exempt from food tolerance – No MRLs
- NOP Organic / OMRI listed

Ask your Ag retailer about AVIV or contact:

Washington: Scott Carpenter 509-412-5400
Oregon & Idaho: Peter Bierma 503-799-4551

AVIV is effective against

- Powdery mildew • *Xanthomonas* spp.
- Apple Scab • *Monilinia* spp.
- *Botrytis* spp. • Downy Mildew
- *Alternaria* spp. • *Phomopsis*
- Bitter Rot • Sour Rot
- Fire blight • *Anthraxnose*

See product label for complete list of diseases.
