

AVIV™

The clear solution for disease control An Advanced Microbial Fungicide

Aviv is a microbial fungicide based on the powerful, patented strain of *Bacillus subtilis* IAB/BS03 delivering broad spectrum disease control both in soil and on plant surfaces.

Aviv is offered as a suspension concentrate (SC) produced using a patent-protected process that optimizes the bioavailability of the active ingredient resulting in very efficient formulation, requiring approximately 40% less product than leading competitors. The manufacturing process of Aviv ensures an endospore that is resistant to unfavorable environmental conditions such as drought, salinity, extreme pH, radiation, and solvents.

Aviv can be tank-mixed with a wide variety of other crop protection products. The advanced formulation process means Aviv solubilizes completely in the spray tank, minimizing the risk of clogged application equipment and eliminating deposit on treated crops. Aviv is colorless and odorless.

With minimal PPE requirements and a high safety profile for the environment, pollinators and neighbors, Aviv is the clear choice for growers.

Label

Aviv is labeled for a wide variety of high value crops including hemp.

Benefits of Aviv

- Clear not staining formulation – no visual residue
- Live active spores for superior duration of disease control
- Effective against both bacterial and fungal diseases
- Very low use rate – superior economics
- One product to control both powdery mildew and gray mold
- Superior for drip irrigation – won't plug lines or emitters
- No MRL, exempt from residue tolerance
- Approved for greenhouse and aerial uses
- For use in conventional, sustainable and organic production models

Diseases Controlled

- Rot diseases like *Botrytis*, *Sclerotinia* and *Monilinia*
- Powdery mildews
- Downy mildews
- Bacterial diseases like *Xanthomonas*, *Pseudomonas*, *Clavibacter* and *Erwinia*
- Late blight (*Phytophthora infestans*)
- *Anthraco*se
- *Alternaria*
- Soil diseases like *Rhizoctonia*, *Pythium*, *Phytophthora* and *Verticillium*
